EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Abraham Rosner on 14 April 2004.

The application has been amended as follows:

In claim 22, line 9, the second "and" has been deleted and replaced with --wherein W is the width of the end cutting edge; and--.

In claim 24, line 11, the second "and" has been deleted and replaced with --wherein W is the width of the end cutting edge; and--.

Allowable Subject Matter

2. Claims 22 and 24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Numerous cutting inserts in the prior art are known to have depressions formed at or near the cutting edge in order to aid or alter chip formation. Simpson (U.S. Pat. No. 5,085,541) shows an insert generally the same size, shape and same configuration as the instant invention. It includes a depression (42) formed in the top surface that extends to the cutting edge. Simpson fails to disclose that the depression is wider and deeper at a point recessed from the cutting edge. Other references such as Kumar (U.S. Pat. No. 6,186,705) show sphere-like depressions that are

Art Unit: 3722

deeper and wider at a point recessed from the cutting edge of the cutting insert but Kumar clearly teaches away from the recited element that the width of the concave edge portion of the cutting edge (W_a) is between $\frac{1}{2}$ and $\frac{2}{3}$ the overall width of the cutting edge. In fact, Kumar teaches a plurality of these elements along the cutting edge. Petterson (U.S. Pat. No. 4,776,733) shows a depression on a cutting edge that appears to meet this limitation for W_a but the depression is clearly not spherical in nature.

The Examiner has considered Applicant's remarks and determined that since Applicant has imparted criticality to the width of the concave cutting edge portion in relation to the overall width of the cutting edge (W), it would not have been obvious to one of ordinary skill in the art at the time the invention was made to discover the relationship between W and W_a .

Furthermore, the Examiner has determined that modifying the depression of Simpson to have both a different shape and to satisfy the equation $\frac{W}{2} \leq W_a \leq \frac{2W}{3}$ would require considerable hindsight reconstruction in light of the of the instant Application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Faxing of Responses to Office Actions (UPDATED)

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing of responses to **ALL OFFICE ACTIONS** directly into the Group at **(703) 872-9306**. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers

Art Unit: 3722

which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the Examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the Examiner.

PLEASE NOTE: the **fax number in the above paragraph has changed**. It is to be used for all responses, **including after-final communications**.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Walsh whose telephone number is (703) 605-0638. The examiner can normally be reached on Monday - Friday 8:30 A.M. to 6:00 P.M., with every-other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea Wellington can be reached on (703) 308-2159.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.
